

Dalvi Hospital

Dalvi Hospital is a charitable hospital with 50 beds located in south Mumbai. Dr Bhandarkar has been active at this hospital for over 14 years and regularly performs laparoscopic procedures, including complex surgeries and single incision laparoscopic operations, here. He firmly believes that the benefits of laparoscopic surgery should be made available to all patients irrespective of their socioeconomic strata. With that goal in mind, Dr Bhandarkar offers his expertise to the patients with modest financial means at Dalvi Hospital.

Operating theaters

Although this is a small-sized hospital, the operation theater complex was completely renovated and modernized a few years ago and is fitted with laminar airflow. The hospital recently acquired state-of-the-art HD camera system and has all the modern laparoscopic instruments including an ultrasonic scalpel. It is thus possible to perform all laparoscopic surgeries at this Hospital, at a modest charge.
