## Operating theaters

Hinduja Hospital boasts one of the best operation theater complexes in the country that is comparable to the best in the world. All the ultra-modern, digitized operating rooms have laminar air flow and hepa filters. The operation theaters have state-of-the-art equipment for minimal access (laparoscopic, thoracoscopic and bariatric) surgery. These include specially designed operating tables for bariatric patients, HD camera systems, multiple LCD screens, modern laparoscopic instruments (dedicated ones for single incision laparoscopic surgery) as well as energy sources such as ultrasonic scalpel and vessel-sealing device.
